RESEARCH SERVICES

Pelagic Research Services Selected to Support WHOI and OSU Seismic NSF Funded Project

“Illuminating the Cascadia Plate Boundary Zone and Accretionary Wedge with a Regional-Scale Ultra-Long Offset Multichannel Seismic Study”

- PI - Suzanne Carbotte (LDEO, Columbia University); Co-PIs: J. Pablo Canales (WHOI), Shuoshuo Han (UTIG)
- PRS to provide ROV and subsea navigation services to deploy and recover hundreds of Ocean Bottom Nodes (OBN)
 - Development and Fabrication of Integrated OBN Skid for ROV Odyssey
 - Depth Range – 90 to 3000 meters
 - Spacing every 500 meters

Contract Manager- Oregon State University

Optimizing Efficiency

- 32 OBN Nodes per Deployment/Recovery
- Long Duration Dives
- Gyro USBL System
- INS/DVL on Odysseus

Postponing of Project

- Multiple Covid-19 Mitigation Plans grounded in UNOLS Guidance documents
 - Outstanding Document
- Multiple Project date changes
- Unfortunately postponement several weeks prior to mobilization
- Compliments to Kaya Johnson, Marine Superintendent OSU & Dr. Pablos Canales

Recently completed projects:

- Ocean Networks Canada – Venus Ocean Observatory Maintenance Operations
 - 16 days - modified 12-hour dive operations
 - Utilization of ROV Odyssey heavy lift and cabled observatory standard latching system to deploy and recover Junction Box platforms, tool baskets etc.
 - Perform other tasks in preparation for ONC August Cruise with ROV Hercules
