

FANTASTIC TECHS

AND WHERE
TO FIND THEM

UNOLS RVTEC
Duluth MN
October 26, 2017

Moderator: Tom Wilson
Stony Brook University

Panelists: David Fisichella, WHOI
Marc Willis, OSU
Rapporteur: Toby Martin, UH

WHAT MAKES A GOOD TECH?

HOW TO FIND THEM?

HOW TO KEEP & GROW THEM?

Dale Chayes, unafraid of Minnesota climate (see upper right drilling through Arctic sea ice) but absent from RVTEC this year to keep promise to Frodo the search dog (see lower right) not to miss upland game bird season again.

Dale via email: *“In awe of a technician (it might have been Butch Grant) at WHOI one day in the mid-80’s, I asked my friend, colleague, and collaborator Don Koelsch where they got them. Don said:*

‘We grow them.’”

WHAT MAKES A GOOD TECH?

Education:

College majors: Marine Sciences better than Engineering/computers (CS: John, John, Toby)

MATE program

Technical training: DeVry etc.?

SEA students

Science background

Mission dependent

Problem solver

Work experience:

Military, especially technical/electronic training

Ex oil patch

Fisheries Observers

Sea Going (seasick?)

Hobbies and interests:

Electronics hobbyist

WHAT MAKES A GOOD TECH? (continued)

HOW TO FIND THEM

“Grow them”: Hire undergraduate student assistants.

Pirate

Grow

Tech Pool

MATE 9 Internships and ROV competitions)

Community College (Associate Degrees?)

REU (Research Experience for Undergraduates)

High School Robotics Team

Public Outreach (head hunting the kids)

Veteran outreach and publications

HOW TO FIND THEM (continued)

HOW TO KEEP & GROW THEM
