# AUV SENTRY OVERVIEW

6,000 Meter depth rated AUV

Designed for maneuverability

Autonomous - pre-programmed missions

Full package (ops, processing, mission planning)

Routine concurrent Operations

Ideal for new and development sensors

# AUV SENTRY SYSTEMS

BOTTOM VIEW

PORT SIDE VIEW

**Missions from 12 to 30 hours,  
running 1-2knots SOG**

**Surveys are  
pre-programmed and  
include high and low level  
surveys**

**Real time acoustic  
communications**

**Third party equipment that is  
highly integrated into the  
vehicle**

**Altitudes 5m to 100m**

**Real time acoustic  
communications**

# OPERATIONAL MODEL

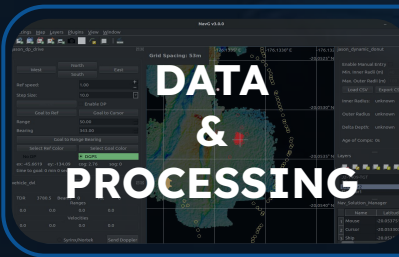

Sentry travels with two 20' containers and will operate on vessels of opportunity. Available to serve the broader scientific community for a wide range of applications.

- 2X - 20' Containers
- Vessels of opportunity
- 5 Sentry personnel
- Pre Cruise planning

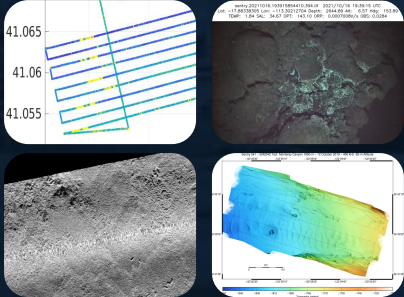

- Mission planning
- Launch/Recover
- Watch standing
- Concurrent operations
- Vehicle configurations and maint.

- First draft data products
- Multibeam
- Sidescan
- Sensor plotting

# AUV SENTRY USE CASES

# SENTRY & ROV/HOV OPERATIONS

## COMBINED OPS

Sentry can be added to many programs to increase efficiency, add a high level view of the worksite, and create a better data product

## DATA

Data products are produced after each dives, photos, MB, Sidescan, sensor plots over navigation and available to the science user

## DIVE PLANNING

Better informed with high fidelity data about your worksite

# PLUME HUNTING

Sentry used as a plume sniffing and hunting vehicle that can cover large areas around a known vent field to identify and characterize plume dispersal.

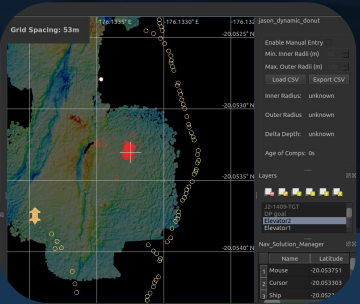

Image courtesy of C.German (WHOI)

## SENSORS

- Methane Sensor
- Water Sampler
- Real time vehicle data
- Optical Backscatter
- CTD

# LARVAL SAMPLING

Larval sampler developed at WHOI allows for near bottom larval samples, allowing Sentry to pump significant volumes of water over the course of the dive.

## SENSORS

- SyPRID
- Optical BackScatter
- CTD
- Optode

# Future of US Marine Seafloor and Subseafloor Sampling (And Sentry)

**How can Sentry be used in the next five to ten years?**

**What capabilities are needed?**

**What technologies need to be developed**

**What technologies need to be integrated**

---
