encountered with expenses but NSF will try to provide some of the added costs.

is due out of the yard at the end of the year. Unexpected costs and problems were
done, the present schedule may not be met. THE MEVIETTE will be in gear in April and
work in Scotland in August. Plutonium could ship with complete jobs and much work to be
shutdown, then to WHOI for scientific outfitting. Tenanea schedule is for the ship to do
back in the water. The earliest date for launching the yard is June 15 with a two-week
decision.
