

Modernized WHOI Marine Operations and NDSF Web Site

The screenshot shows a Netscape browser window displaying the WHOI Marine Operations website. The browser title is "WHOI Marine Operations - R/V Atlantis - Netscape". The address bar shows the URL: http://internal.whoi.edu/dfino/beta/marineops/research_vessels/atlantis/index.html. The website header includes the WHOI logo and the text "Woods Hole Oceanographic Institution Marine Operations". Navigation tabs include "Research Vessels", "Vehicles", "Cruise Planning", "Support Services", and "Port Office". A sub-menu under "Research Vessels" shows "Overview", "Atlantis", "Knorr", "Oceanus", and "Asterias". The main content area features a sidebar with a list of links for "R/V Atlantis": Main, Specifications, Scientific Equipment, Shipboard Computing, Policies & Procedures, Ship Schedule, Cruise Synopses, Layout & Berthing Diagrams, and Where is Atlantis. The main text describes the vessel: "The Research Vessel *Atlantis* is operated by the Woods Hole Oceanographic Institution for the American ocean research community. It is one of the most sophisticated research vessels afloat, equipped with precision navigation, bottom mapping, and satellite communications systems." A photograph of the ship is shown with a "Click to enlarge" link. Below the photo, it states: "Atlantis is designed as a general purpose vessel and specifically equipped to support the US National Deep Submergence facility, which includes the crewed submersible Alvin, the remotely operated vehicle Jason, and the towed vehicles Argo II and DSL 120." At the bottom, it notes: "Atlantis (AGOR-25), delivered to WHOI early in 1997, is one of a new class of US Navy research vessels designed and built by the Trinity Marine Group's". The browser's status bar shows "Document: Done" and the system tray displays the time as 1:20 PM.
