

DESSC, “the yo-yo,” and the AICC

DESSC experience

- Tried a formal “hero” approach, with moderate and diminishing success
- Advent of ROV’s partially eliminated the problem by enabling fly-away operation from multiple ships
 - Many PI’s won’t even bother to propose *Alvin* work outside of Endeavour/JdFR area
- Recommend hero approach for AICC, however
 - Essentially two ops areas, rather than global
 - Unlikely to have a *Jason*-like solution...
