The National Science Foundation
4201 Wilson Boulevard, Stafford I, Room 375
Arlington, VA

July 20, 2005

Scheduling Review Meeting
July 21, 2005

The plan is to move quickly through all schedules updating funding status if known, identifying double bookings, orphan projects and problems or issues that require further discussion and resolution. In order to get through all schedules while program managers are present and to be sure we have identified all major issues, we will need to refrain from prolonged discussion and attempts at solving problems until after we have reviewed all schedules. As much time as possible will be set aside in the agenda to work on resolving outstanding issues by region and class of ship.

Just before lunch we will work on issues related to Regional and Intermediate Class vessels. The discussion of options and solutions for the large ships and ROV's will take place just after lunch.

A wrap up and review of outstanding issues will take place Thursday morning for program managers with UNOLS Executive Secretary, Scheduling Chair and any schedulers staying for the second day. This will be followed by a review of the new UNOLS scheduling and ship request database system.
