

# RF Spectrum Report

# RF Subcommittee Activity Since Last UNOLS Meeting

- The subcommittee revised their survey form
- Richard Perry circulated a hardcopy of the form at the RVTEC meeting and asked participants to fill it out
- Mike Prince targeted input from key scientists who use the RF spectrum
- Richard Perry compiled all of the data into a report and sent it to the UNOLS Office (this report has been submitted with this presentation)
- In turn, the Office sent it to NSF (Andrew Clegg and Dolly) on Nov 19<sup>th</sup>
- Future plans - Richard plans to continue efforts to distribute the survey to key groups.
- We would like to ask the Council to direct us as to what to do next
