

# FIC Action Items

- SMR Update Project– Status: On-going. Focus of March 09 Meeting. Need to continue with a teleconference.
- Input to the Ocean Class Research Vessel RFP Development. Status – UNOLS provided feedback on OC Specs, Oct 08. Updated SMRs provided as soon as review done.

# FIC Action Items

- KILO MOANA Actions: In touch with U. Hawaii to keep abreast of Handling System details. **Status: System is being constructed. Hopefully, installed and tested in November.**
- Science User Debriefs for R/V *Hugh Sharp* – Draft user debrief questions that will evaluate the new technologies of the ship. Conduct debrief interviews with *Sharp* users. **Status – Drafted questions discussed. Revisions needed.**
- WHOI Long-Coring System – First scientific just completed. - **Presented results. Discussed whether debriefing of Chief Scientists should be done. Should FIC do this or another committee be formed to oversee this facility?**

# FIC Action Items

- Ocean Observatories - Stay in contact with OOI Office. (Dave Hebert – Ongoing)
- Design and Constructions Efforts - Stay engaged in ongoing design and construction efforts (Regional Class, ARRV, Ocean Class, etc.) – Status: FIC – ongoing
- Fleet Improvement Plan Update: Finalize document draft and provide to UNOLS Council. Status: Draft has been provided to Council. Waiting approval by Council subject to minor modifications such as in Projected End of Service Life - past dates changed to 2010.
