

RVTEC November 2010 - FBB

- Program established 1 January 2010
- Program covers 3 years for 20 users
- Rate reduced from \$11.34/MB to \$1.52/MB
- Total pool size established at just over 40 GB/Month

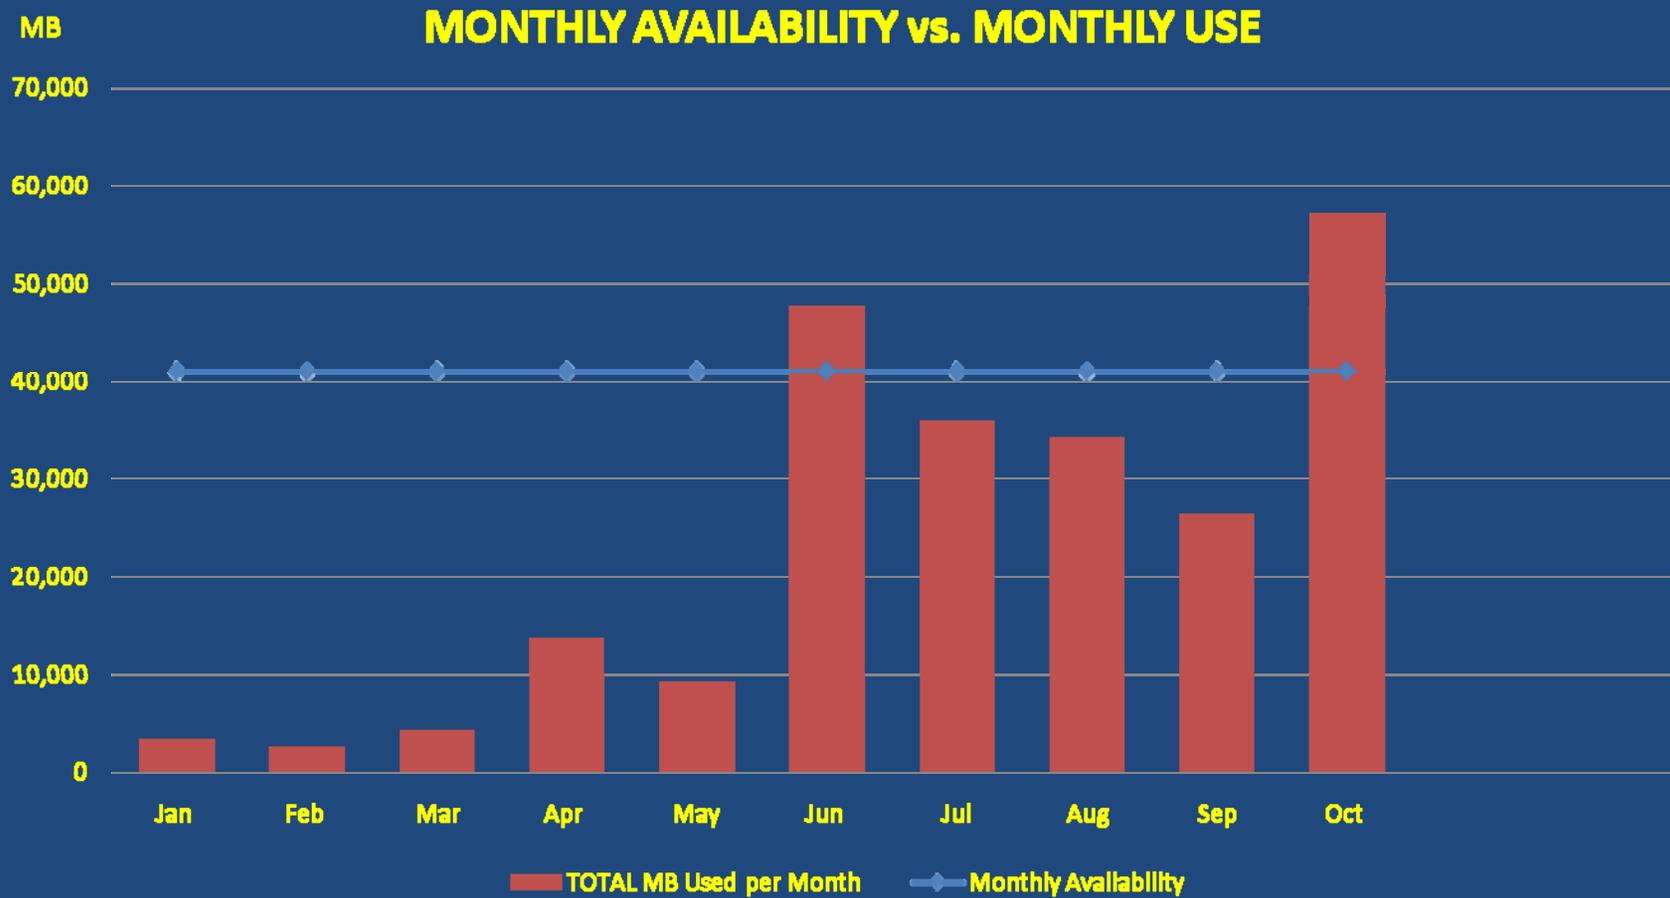

RVTEC November 2010 - FBB

- Unused balance will carry-forward month to month for 1 year period
- Within one year period, use or lose
- Negotiating Carry-Forward Allowance in YEAR 1 to 2 Only
- Add more ships?
- If user pool exceeds allowance, use rate increases to \$2.28/MB
- FTP site, <ftp.who.edu>, established to allow users to monitor usage. Member institutions provided with individual user and password login information

RVTEC November 2010 – FBB

RVTEC November 2010 – FBB

Discussion

- FBB is being used more recently. This is good, will continue to monitor
- How often was it necessary to switch from HSN to FBB?
- Feedback on one system vs. the other
- Best Practices? e.g. SIO on Melville
- Other alternatives?

Fleet Broadband Network

- **Some interesting information that will help you check their performance.**

Fleet Broadband Network

- There is a hidden technical webpage viewer, accessible through your Internet browser.
- This webpage has information that will help you decide whether the system is at fault, or somewhere else.

Maintenance Page

Type in your Web Browser: (case sensitive)

<http://192.168.0.1/index.lua?pageID=Maintenance>

<http://192.168.0.1/index.lua?pageID=Maintenance>

NOTE!

Maintenance page
Hidden maintenance page.
Use the below URL.

<http://192.168.0.1/index.lua?pageID=Maintenance>

Java engine will
have to be installed.

Thrace & Thrace

SIGNAL: [Signal strength bars] [Warning icon]

Internal status page for Thrace & Thrace technical staff.

SYSTEM	
Build no.	3.4.1; build 28
IMEI	351621620096001
IMSI	901112314098009
IM class	0
Temperature	44
Uptime	0d 02h05m

ANTENNA	
Type	9750K 200 MHz Broadband
Status	Not implemented
Temperature (top)	0
Temperature (low)	--

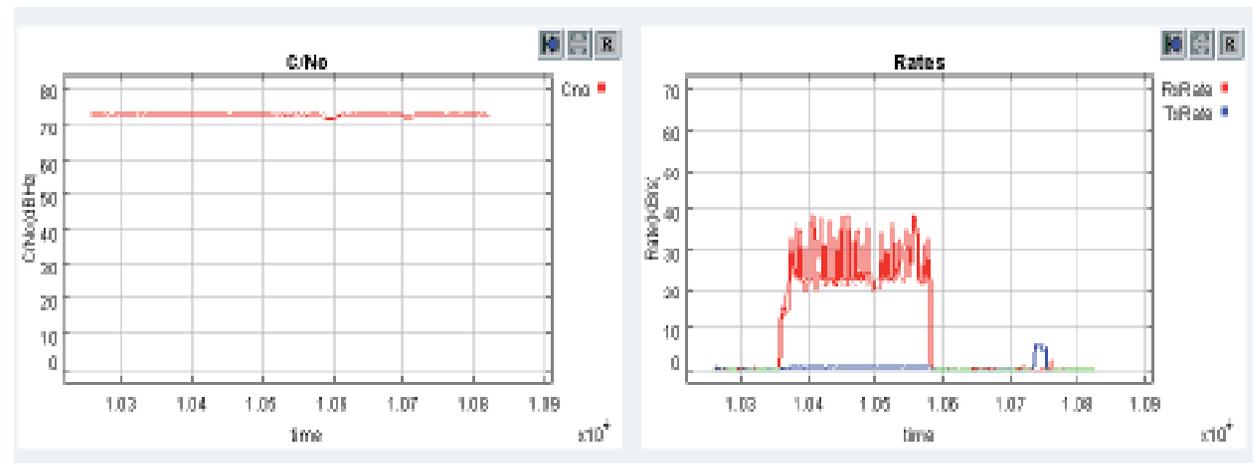

GPS	
Fix type	3D
Position	55°47'38".66 N 12°41'22".76 E
Position age (sec)	1
Speed (km/h)	0.0
Heading	0.0

SATELLITE	
Acq	FMFA
Position	Low 25.1°
Elevation	25
Elevation band	1

NAG	
Rx throughput (kb/s)	0.0
Tx throughput (kb/s)	0.0
RS status	Attached
CS status	Attached
PUMN status	Selected
Service status	2 active sessions

IAR	
Antenna (AL)	Registered
Status (ant_ant)	Registered
Beam type	Narrow
Load ID	100
C/Ns	73.0
Raw(Tx) frequency	1881.300 MHz
Channel no.	17120
Raw(Tx) index	8818448
Raw(Tx) bytes	122261
Tx queue	0
Ciphering	On
Dropped packets	0
CRC errors	4
Rx retransmissions	253
Tx retransmissions	98
BGn status	2 active connections

Maintenance Page

Contains valuable information about:

- System ID numbers, & temperature of terminal.

SYSTEM	
Build no.	1.12, build 3
IMEI	351624020001055
IMSI	901112114105601
UT class	8
Temperature	42
Uptime	5d 15:23:07

Maintenance Page

Contains valuable information about:

- Antenna type, High power amplifier temperature (HPA).

ANTENNA	
Type	SAILOR 500 FleetBroadband
Status	Not implemented
Temperature (hpa)	42
Temperature (acm)	--

Maintenance Page

Contains valuable information about:

- Satellite being used, Longitude and elevation of satellite.
- (Note, you can use the Longitude to estimate the direction in relation to the vessel's heading (*to check for shadowing.*))

SATELLITE	
Name	Americas
Position	Lon: 97.6°
Elevation	43
Elevation band	3

Maintenance Page

- System status. beam type & spot number, transmit & receive frequencies/data information through the pipeline.

IAI2

Status (AL)	Registered
Status (bcn_bct)	Registered
Beam type	Narrow
Spot id	193
C/No	67.5
Fwd(Rx) frequency	1534.100 MHz
Channel no.	9640
Fwd(Rx) bytes	2602484013
Rtn(Tx) bytes	362487367
Tx queue	0
Ciphering	On
Dropped packets	0
CRC errors	84
Rx retransmissions	25224
Tx retransmissions	32005
BCn status	2 active connections

Maintenance Page

Contains valuable information about:

- **Network-attached Storage (NAS): RX & TX throughputs, number of active or inactive sessions.**

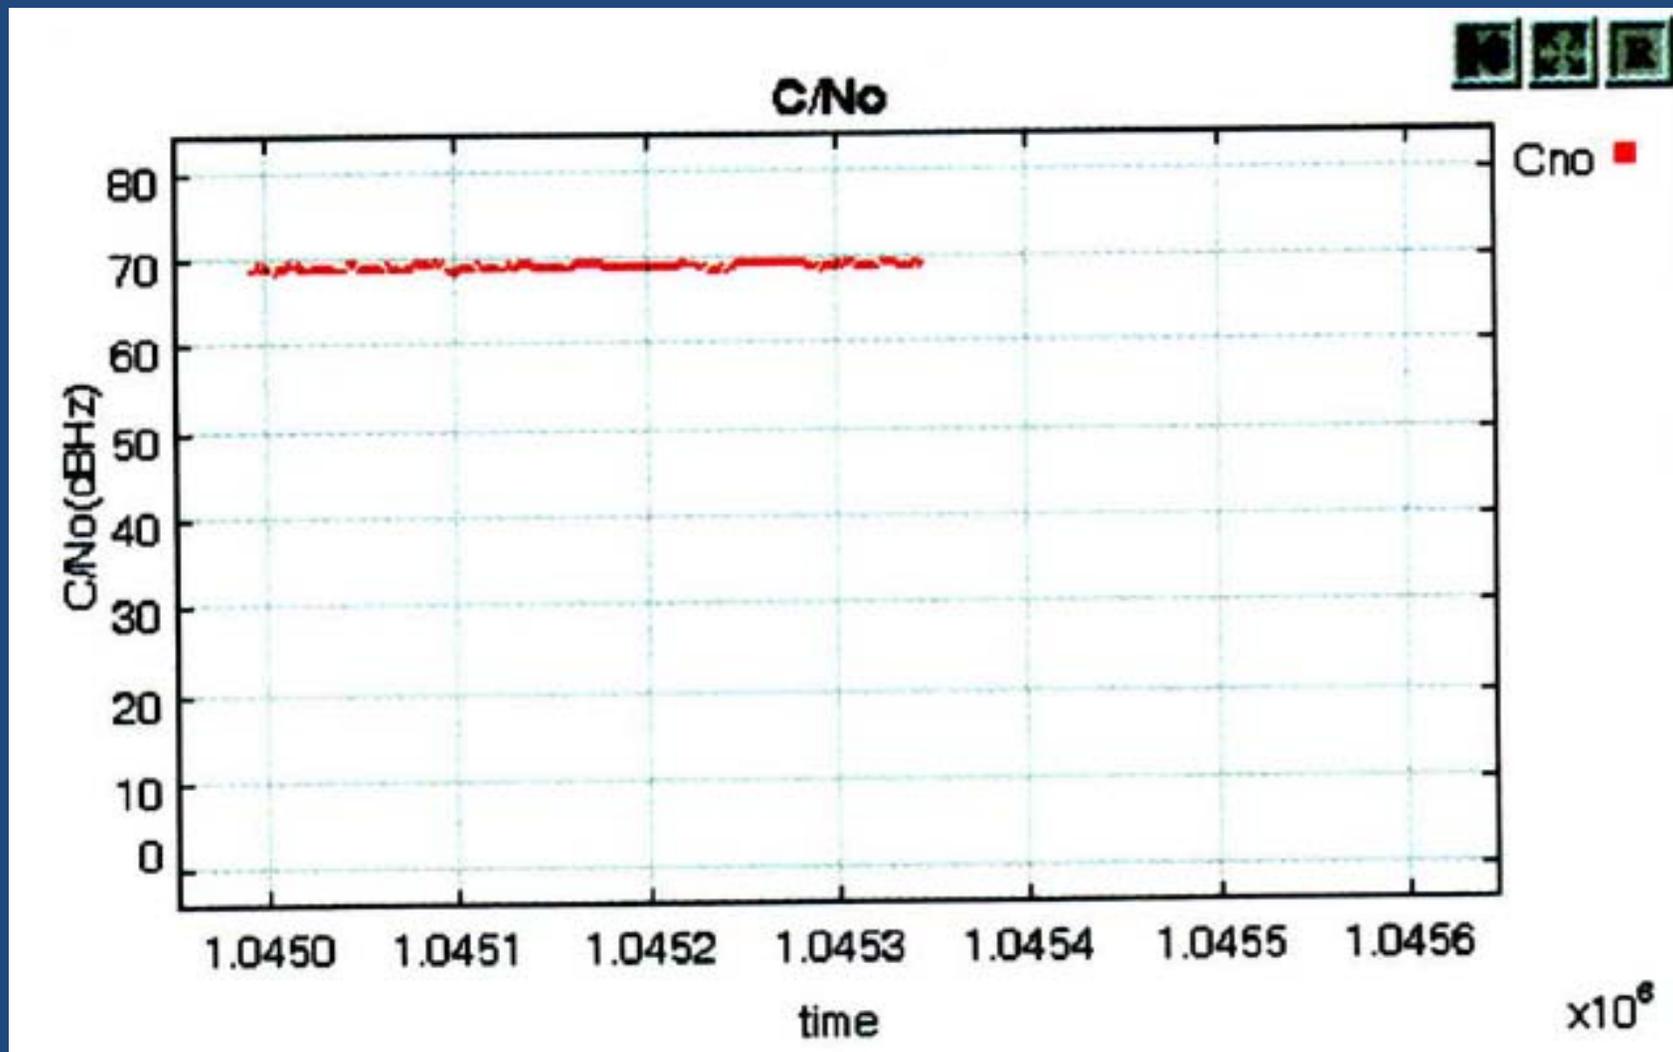

NAS

Rx throughput (KB/s)	1.2
Tx throughput (KB/s)	0.0
PS status	Attached
CS status	Attached
PLMN status	Selected
Session status	1 active session

Maintenance Page

Contains valuable information about:

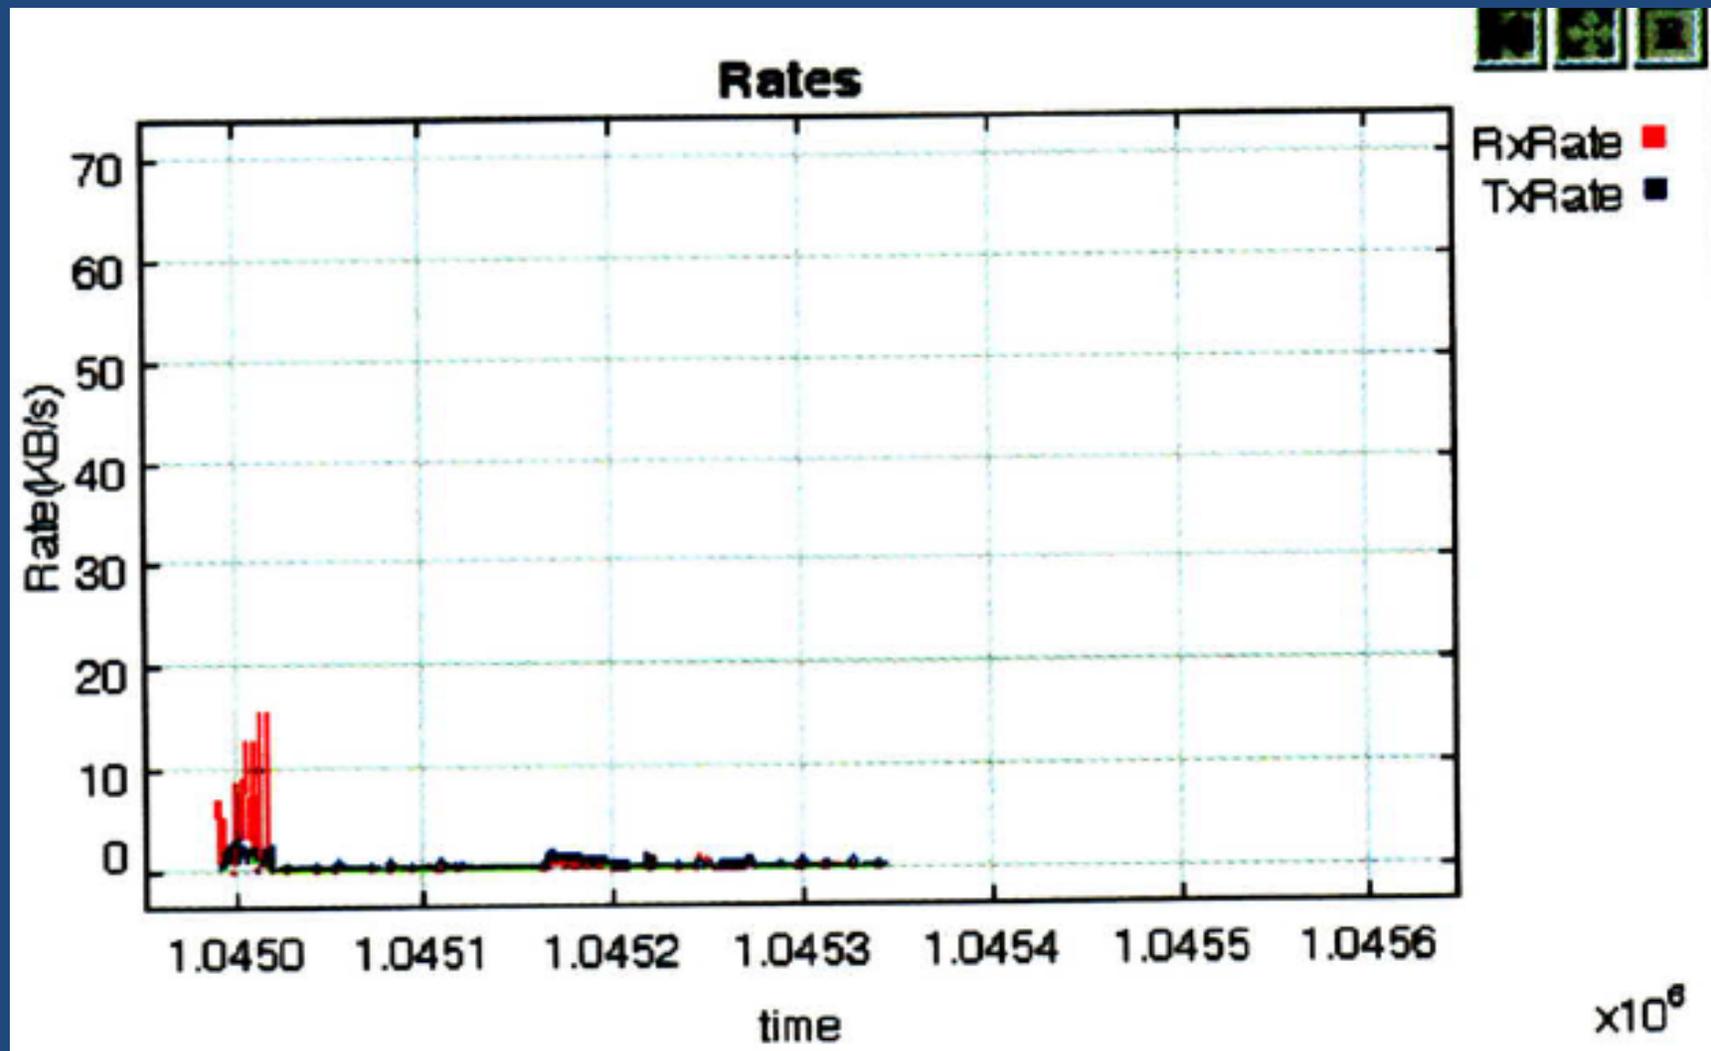

- Carrier to Noise (C/No) signal levels.

Maintenance Page

Contains valuable information about:

- Actual data TX & RX rates through the satellite pipeline .

Here is a handy Telnet trick:

Type:

```
telnet:/$ cnav -m pos
```

- This will give you more of the same information, only more detailed.

If the packet sizes are in the millions-

- the radome is probably being shadowed.
