

Action Items

Assess responsibility for logistics when operating through Nome or other ports outside the Barrow region.

Decide whether to store TSE mooring winch at WHOI or SIO (NSF).

Finalize and publish *Healy* data release policy (Forcucci).

Evaluate status of NIC and ice imagery issues (Perovich, Frey).

Evaluate *Healy* van relocation (CG, AICC).

Evaluate *Healy* UPS replacement goals and procedure (CG, AICC).

Clarify role of the MSO prior to - versus during - cruises.

Action Items (cont'd)

Update berthing information and get it onto IceFloe (Mayer).

Decide on whether or not to keep on-deck electronic “scoreboards” (AICC).

Get a description of on-ice operational procedures, emphasizing safety issues, onto IceFloe (Perovich).

Continue development of Alaska native participants program, and post related information on IceFloe (Mathis).

Ongoing Concerns

Evolution of cruise planning form on IceFloe.

Science equipment MOA between NSF and USCG.

Science logistics support to cover e.g. radioisotope use.

Service and maintenance contracts e.g. -80° freezers.

Clarification/coordination of interactions among foreign vessel ops, US-DOS and Alaska Native communities.

Evolution of medical screening process.

Development of a plan for assuring *Polar Star* science capabilities (CG, AICC, NSF).
