Deep Submergence Laboratory  
Woods Hole Oceanographic  
Institute

# New LARS crane and docking head currently on Atlantis

# Active Heave Compensation winch

- Selected a manufacturer for the new AHC winch for Jason operation
- AHC to 6500m
- Utilizes 300A, 480V 3 phase circuit available on UNOLS Vessels
- Allows for Observatory package deployments via .681 FO cable, under Medea
- Complies with RVSS APPX A&B
