UNOLS Goals

Ideas for future goals?

• Continue to develop ways of promoting positive & safe working environment at sea (harassment)

• Improving quality of life and morale at sea (food, exercise, fun)

• Develop effective way to give broader community access to more complex equipment in the UNOLS pool (insurance issues, tech support)

• Something related to UNOLS office re-compete

• Better integration of UNOLS activities with those of rest of federal research fleet

• Continue to maintain closer ties with OPP

• Continue to develop opportunities for next generation of ocean scientists (shadow chief scientists)

• Encourage operators to solve problems by formally recognizing institutions annually for their strides in workplace environment (over boarding safety, cruise planning, etc.). (Provide incentives, since hard to enforce)
