

OOIFB /DDCI Community Survey

Opportunity to share feedback on OOI Data Delivery Systems:

- The survey is needed to evaluate Ocean Observatories Initiative (OOI) data delivery systems and to assess the extent to which they meet the needs of the user community.
- The information gathered will be used to improve the current OOI data delivery systems and perhaps develop other systems that better meet the needs of users.
- We want to know what you think of the OOI data delivery systems and how they could be improved for users.
