  - Developed for NIOZ & NERC, since implemented for GEOMAR, being implemented by CSIRO
  - Modular, Cloud Based system that supports in integrated fashion:
    - Scheduling
    - Cruise Planning
    - Route Planning
    - Post Cruise Assessment
    - Equipment management
    - Supply management
    - Crew resource management
    - And more!
  - Development & Implementation supported by NSF & ONR

Annual Meeting
Initial meeting on 12 Nov with Beiko Maas of Maas Software Engineering (MSE – Groningen, NL) who developed & supports system

Proposal submitted for requirements definition workshop in January 2020 in Seattle w/MSE

- This will lead to fully understanding scope of effort => assemble cost & schedule estimate plus development/implementation plan

Based on initial discussions – belief that system could be developed & implemented within a year

- Many of the building blocks already developed & in use
- What we do is very similar to other operators – just a bigger fleet & multiple operators involved.
- It’s more about understanding UNOLS processes & then integrating existing/new blocks to support necessary processes

Target: Support 2022 scheduling process
The Marine Facilities Planning system (MFP) is a NIOZ/NERC software development collaboration designed to integrate the different aspects of equipment management and ship programming, to streamline and integrate the process of delivering science cruises.

The MFP comprises a number of different modules designed to work as an integrated system or used as independent modules. The integrated system can be used as a complete system for voyage planning, equipment management, and cruise project delivery. Its modular design is able to be adjusted to each organisation's specific requirements and scope of operation from large Global Class fleets to single regional vessels.

The MFP is available for use by other institutions and organisations internationally and we would be pleased to discuss your requirements and interest in accessing the system.
RVSS Update

- RVSS is now 4 years old and due for a refresh
- Working with Safety Committee Chair Jeff Garrett on a rewrite/refresh plan
- Examples of some key areas that require attention:
  - Chartering non-UNOLS Vessels / Chapter 18
    - Draft of new guidance submitted for concurrence
  - Aviation Operations / Chapter 19
    - UAS Guidelines
    - No Helicopter capable ships
  - Rope & Cable Standards / Appendix A
    - Synthetic line?
