**Awarua: Gateway**

**Where We  
Operate**

Kepler KIPP Spacecraft

Intelsat 35e Spacecraft

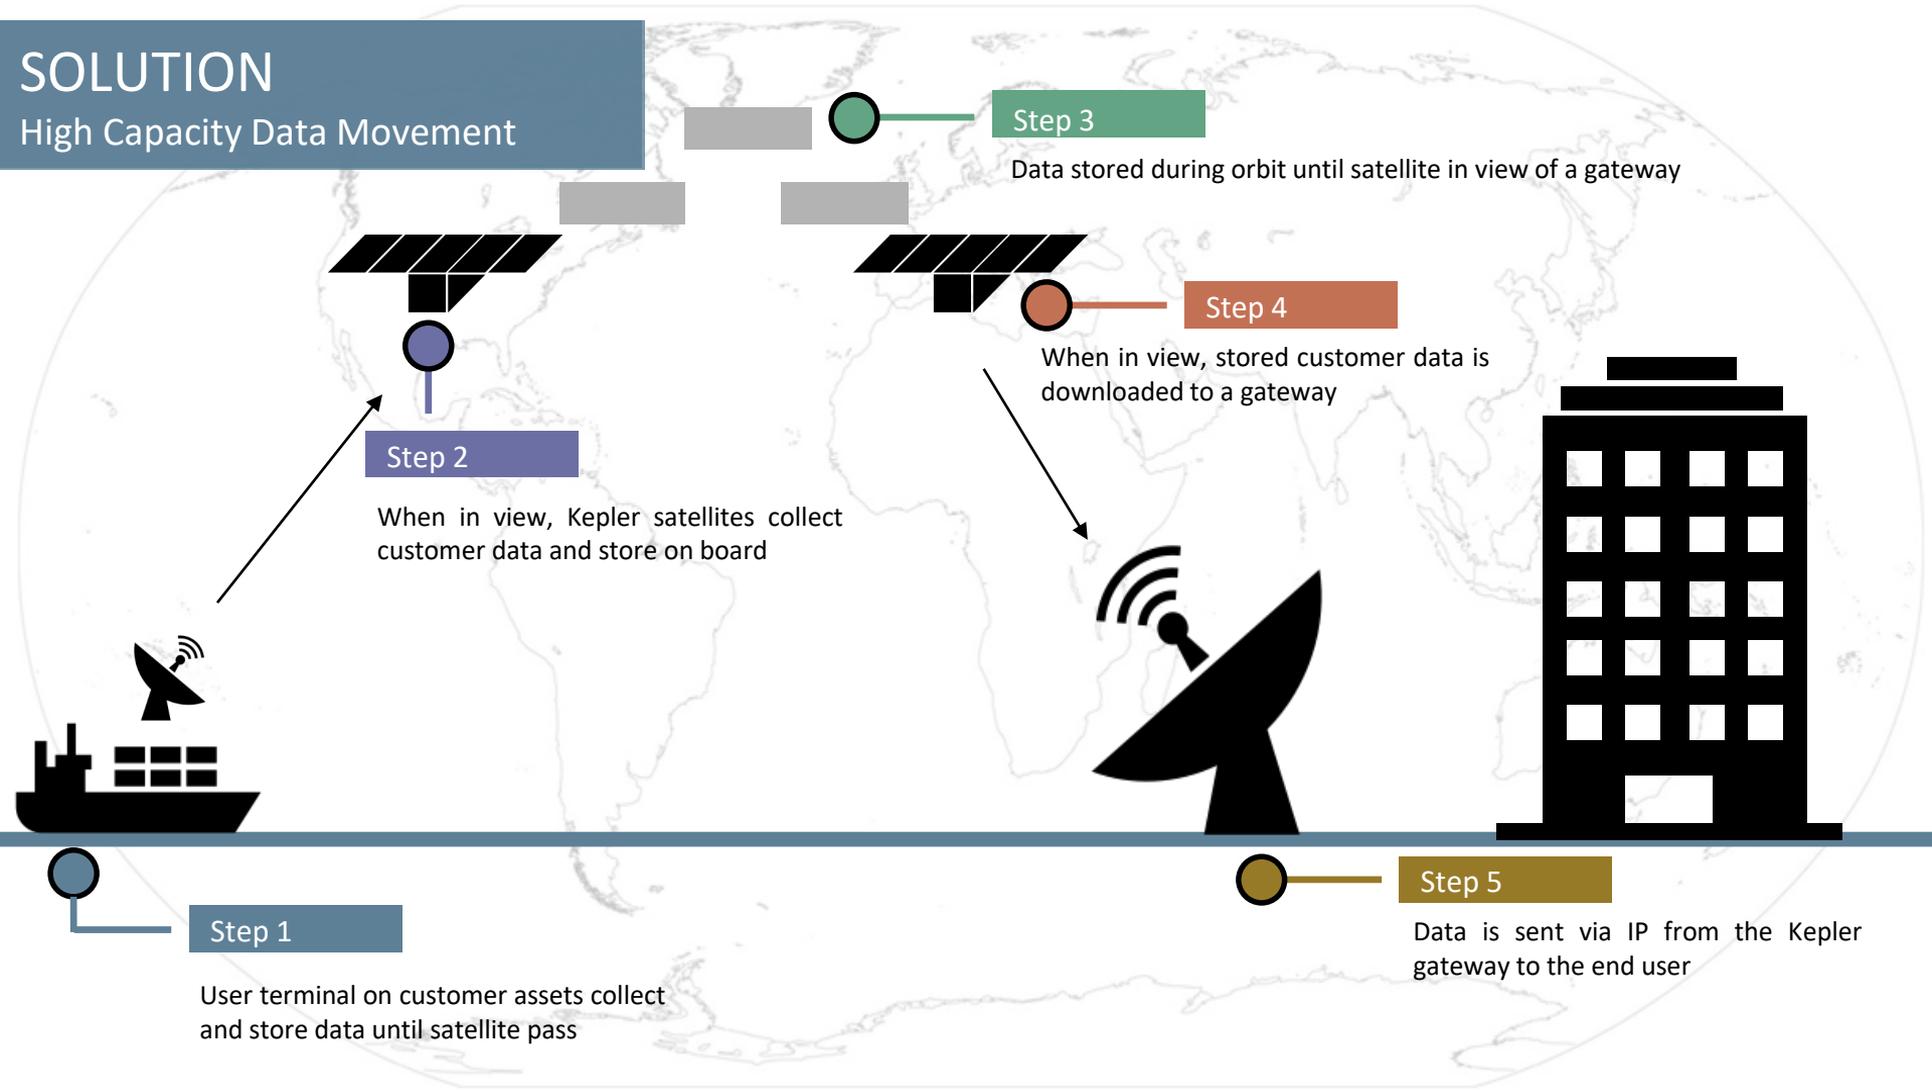

# Nanosatellite-Enabled Communications

- *World's First Ku-band LEO Satellite*
- *200+ Mbps Bidirectional* data speeds demonstrated on a 60CM VSAT and Kymeta's U8 ESA
- Compatibility with existing VSATs from C-COM, Cobham, Intellian & Kymeta
- **SDR that supports wideband (Ku) and narrowband/loT (S-band) from a single platform**

# SOLUTION

## High Capacity Data Movement

Step 1

User terminal on customer assets collect and store data until satellite pass

Step 2

When in view, Kepler satellites collect customer data and store on board

Step 3

Data stored during orbit until satellite in view of a gateway

Step 4

When in view, stored customer data is downloaded to a gateway

Step 5

Data is sent via IP from the Kepler gateway to the end user

# User Terminal

---

## Outdoor Equipment | Antenna & Radome

---

Radome Size (D x H) 113 x 120 cm

Weight 90 kg

---

## Indoor Equipment | Modem

---

Dimensions (H x W x D) 43 x 41 x 4.5 cm (1U)

---

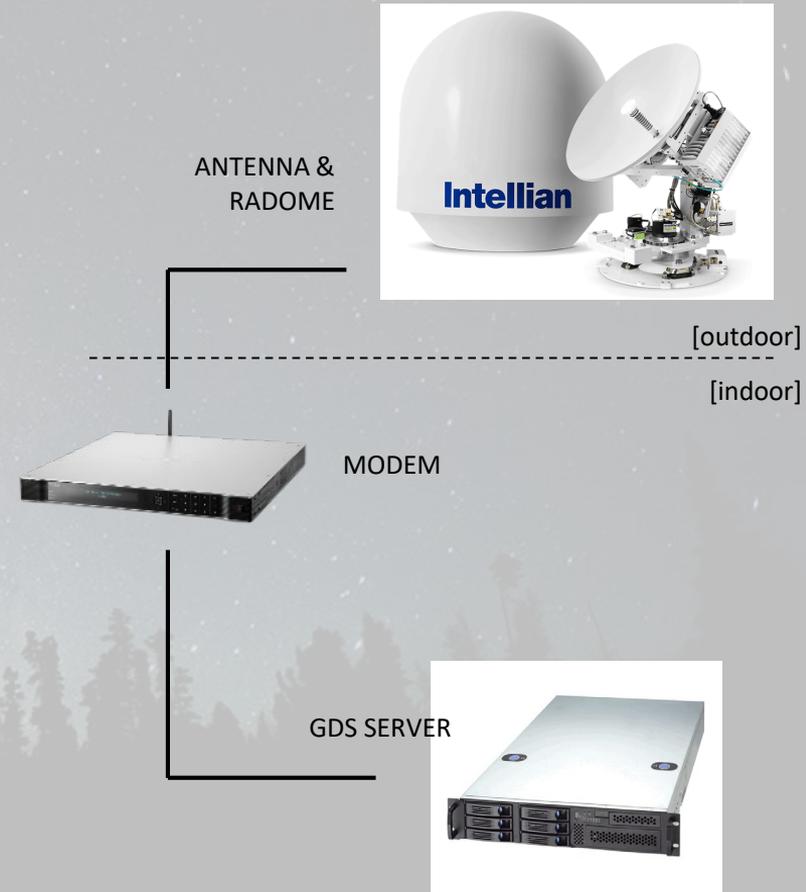

## Indoor Equipment | GDS Server

---

Dimensions (H x W x D) 43 x 41 x 4.5 cm (1U)

Data Interfaces USB3.0, GigE

---

# Global Data Service Applications

## SEISMIC

## POLAR

## SCIENCE

## HYDROGRAPHY

## **SEISMIC VESSELS**

Cost-effective means to deliver seismic data to customer servers and improve survey efficiency.

## **POLAR WIDEBAND**

World's only pole-to-pole wideband data service for civilian and government applications

## **SCIENCE**

Offering a low-cost alternative to move bulk scientific data from remote stations

## **HYDROGRAPHY**

Improve the operational effectiveness of hydrographic and oceanographic surveys

# Use Case: German *Polarstern* Icebreaker

---

## **POLAR OPERATIONS**

90% of service life is in polar regions outside of traditional GEO satellite coverage

**Solution:** LEO nanosatellites provide polar coverage

## **LARGE DATA NEEDS**

Required wideband connectivity solution for operational and public-engagement data needs

**Solution:** Provide up to 500GB/mo capacity

## **BACKWARDS COMPATIBILITY**

Recent deployment of SeaTel 9711 Ku/C dual-band system without deck space for new antennas

**Solution:** System designed as backwards compatible with Ku-band VSAT

# R/V Sikuliaq Deployment
