Overexertion / Bodily Reactions	8
Illness (Including Heart Conditions, Diseases, etc.)	16
Total Number of Incidents	36
<hr/>	
Total Crew Days Reported (At Sea and In Port)	16775
Number of Accidents Resulting in Lost Time for Crew Members	2
Total Crew Days Lost	48

UNOLS Fleet Safety Statistics Report

Year: 2023 Quarter: 2 No of Ships Reporting: 17/17

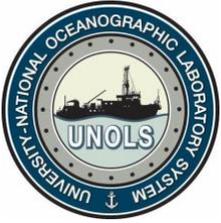

Incident Details	Warnings / Lessons Learned
Mariner was struck on the head from a coring sample while trying to organize the samples in the Reefer container. It was not a significant injury and pain medication was administered and her condition was monitored.	Take extra caution when trying to store/arrange sediment samples in reefer van, make sure samples are secure.
Two cases of Covid. Covid protocols kept it from spreading.	
One crewmember had a rash and the allergic reaction to medication.	
Two case of Covid: Covid protocols were followed and successfully mitigated the spread of disease through the ship.	
One mariner had an infection, successfully treated on shore and at sea.	It is really great to be able to work with GWMMA when medical issues come up.
One case of very high blood pressure treated onboard and onshore possible P&I case.	
One crewmember injured his back in the engine room, this is now a P&I case.	Keep reviewing SSM procedure and updating procedures. Stress to crew the reasons why you need to practice proper technique when lifting any object include this will reduce the risk of injury. Promoted back health. Ensures you can safely complete job tasks.
Crewmember reported pain in right arm after changing wire on the Back Deck. Prescribed Ibuprofen. GW Medical recommended referral ashore for further eval. Mariner taken to Urgent Care upon arrival of ship on 5/20/23 for eval. No time lost.	
Mariner reported bumped head on upper rack while waking up for watch due to motion of vessel. Weather reported 7 - 8 ft seas at time of injury. Prescribed ibuprofen, no time lost.	
Crewmember reported discomfort in left ear. Contacted GW Medical, diagnosed ear infection and prescribed ear drops

and ibuprofen. Mariner reported condition improved and case closed, no time lost.	
Mariner reported dental discomfort on upper left molar. Referred ashore to dentist upon vessel return to port. No time lost.	
Crewmember slipped and fell while tracing a system in the engine room.	
Crewmember complained of sore throat and earache.	
Crewmember complained of lower back muscle spasms.	
Three Crewmembers tested positive for COVID	
Crewmember complained of irritation in right eye.	
Crewmember experienced chest pain/pressure and was medevacked from vessel	
Mariner strained back muscle during small boat ops	
One positive test for COVID 19, mariner was removed from vessel by small boat and brought to homeport. Sent home to recover.	
Crewmember bumped her head on bookshelf while working on computer. Had a slight bump on the top of her head. She was given ice.	
Crewmember scraped her leg on wooden box that hold Trace metals CTD bottles.	
Mariner cut his head while shaving. Had to put NIX stick on wound to stop bleeding then apply large Band-Aid to cover wound.

<p>Crewmember lost his footing in rough weather while getting supplies from FWD Storage. He caught himself on the shelf with his left wrist so he would not fall to the deck. Some small bruising to his wrist was present.</p>	
<p>Mariner had an anxiety attack. Crewmember was treated with direction from GW Maritime. Upon request and approved by the Chief Scientist a port call was made to remove this inflicted mariner from the ship. The cruise resumed.</p>	
<p>Possible hernia from overexertion.</p>	
<p>Eye injury from debris from chipping above mariner.</p>	
<p>Severe seasickness.</p>	
<p>Crewmember tested positive for COVID; isolated.</p>	
<p>Mariner slipped on a ladder and scraped her arm.</p>	
<p>Crewmember injured while going down ladder to launch in rough seas, this is now a P&I case.</p>	
<p>Mariner sustained back muscle injury while carrying stores up stairwell. Referred ashore for evaluation and diagnosed muscle strain and prescribed lidocaine patches and ibuprofen. Mariner returned to duty.</p>	<p>Review proper methods for lifting and carrying loads by hand, especially when moving about vessel. Methods include lifting with legs to avoid straining back, keeping load balanced and near body, reducing load into more manageable weights, or asking for assistance to avoid injuries.</p>
