In November 2022 the Captain and crew of the R/V ATLANTIS rescued Alvin. It is the only ship in the U.S. academic fleet outfitted to handle DSV Class of Vessel: Operator: Crew Berthing: unolsem@unols.org

The UNOLS Crewing Tiger Team continues to meet regularly to work on continue to be gathered and shared biannually to better understand the increase in foreign port calls, and/or the significant increase in outreach but it could be a combination of increasing pay across the ARF, the open positions dropped to 54. That is a 24% reduction in the number of across the ARF for the next 6 months. In May 2023, the number of significant reduction in the open positions aboard the vessels relative to to be more difficult than before the pandemic, there appears to be a Open Positions Update Crewing Corner

Research Planner module. These three minute tutorials have proven helpful to the operators. Please contact mfp@unols.org.

The reports to justify equipment and instrumentation improvements and program managers at the agencies that fund the Academic will meet virtually on Monday, 18 September, to discuss updating the regional plan for supporting at-sea seismic research with R/V MARCUS G. LANGSETH.

Columbia University's Lamont Doherty Earth Observatory has indicated its intent to operate R/V MARCUS G. LANGSETH beyond 2024 for Operate Beyond 2024 R/V MARCUS G. LANGSETH Operations to R/V TAANI are expected in 2025 under current timelines.

Conducting trials of the scientific tools, sensors and equipment in the ship and its new OSU-based crew will spend several months weeks of operational testing; and conduct sea trials to ensure the vessel is ready for its mission.
