

# NAUTILUSLIVE.ORG

OCEAN EXPLORATION TRUST

DESSC MEETING — FEBRUARY 18, 2024

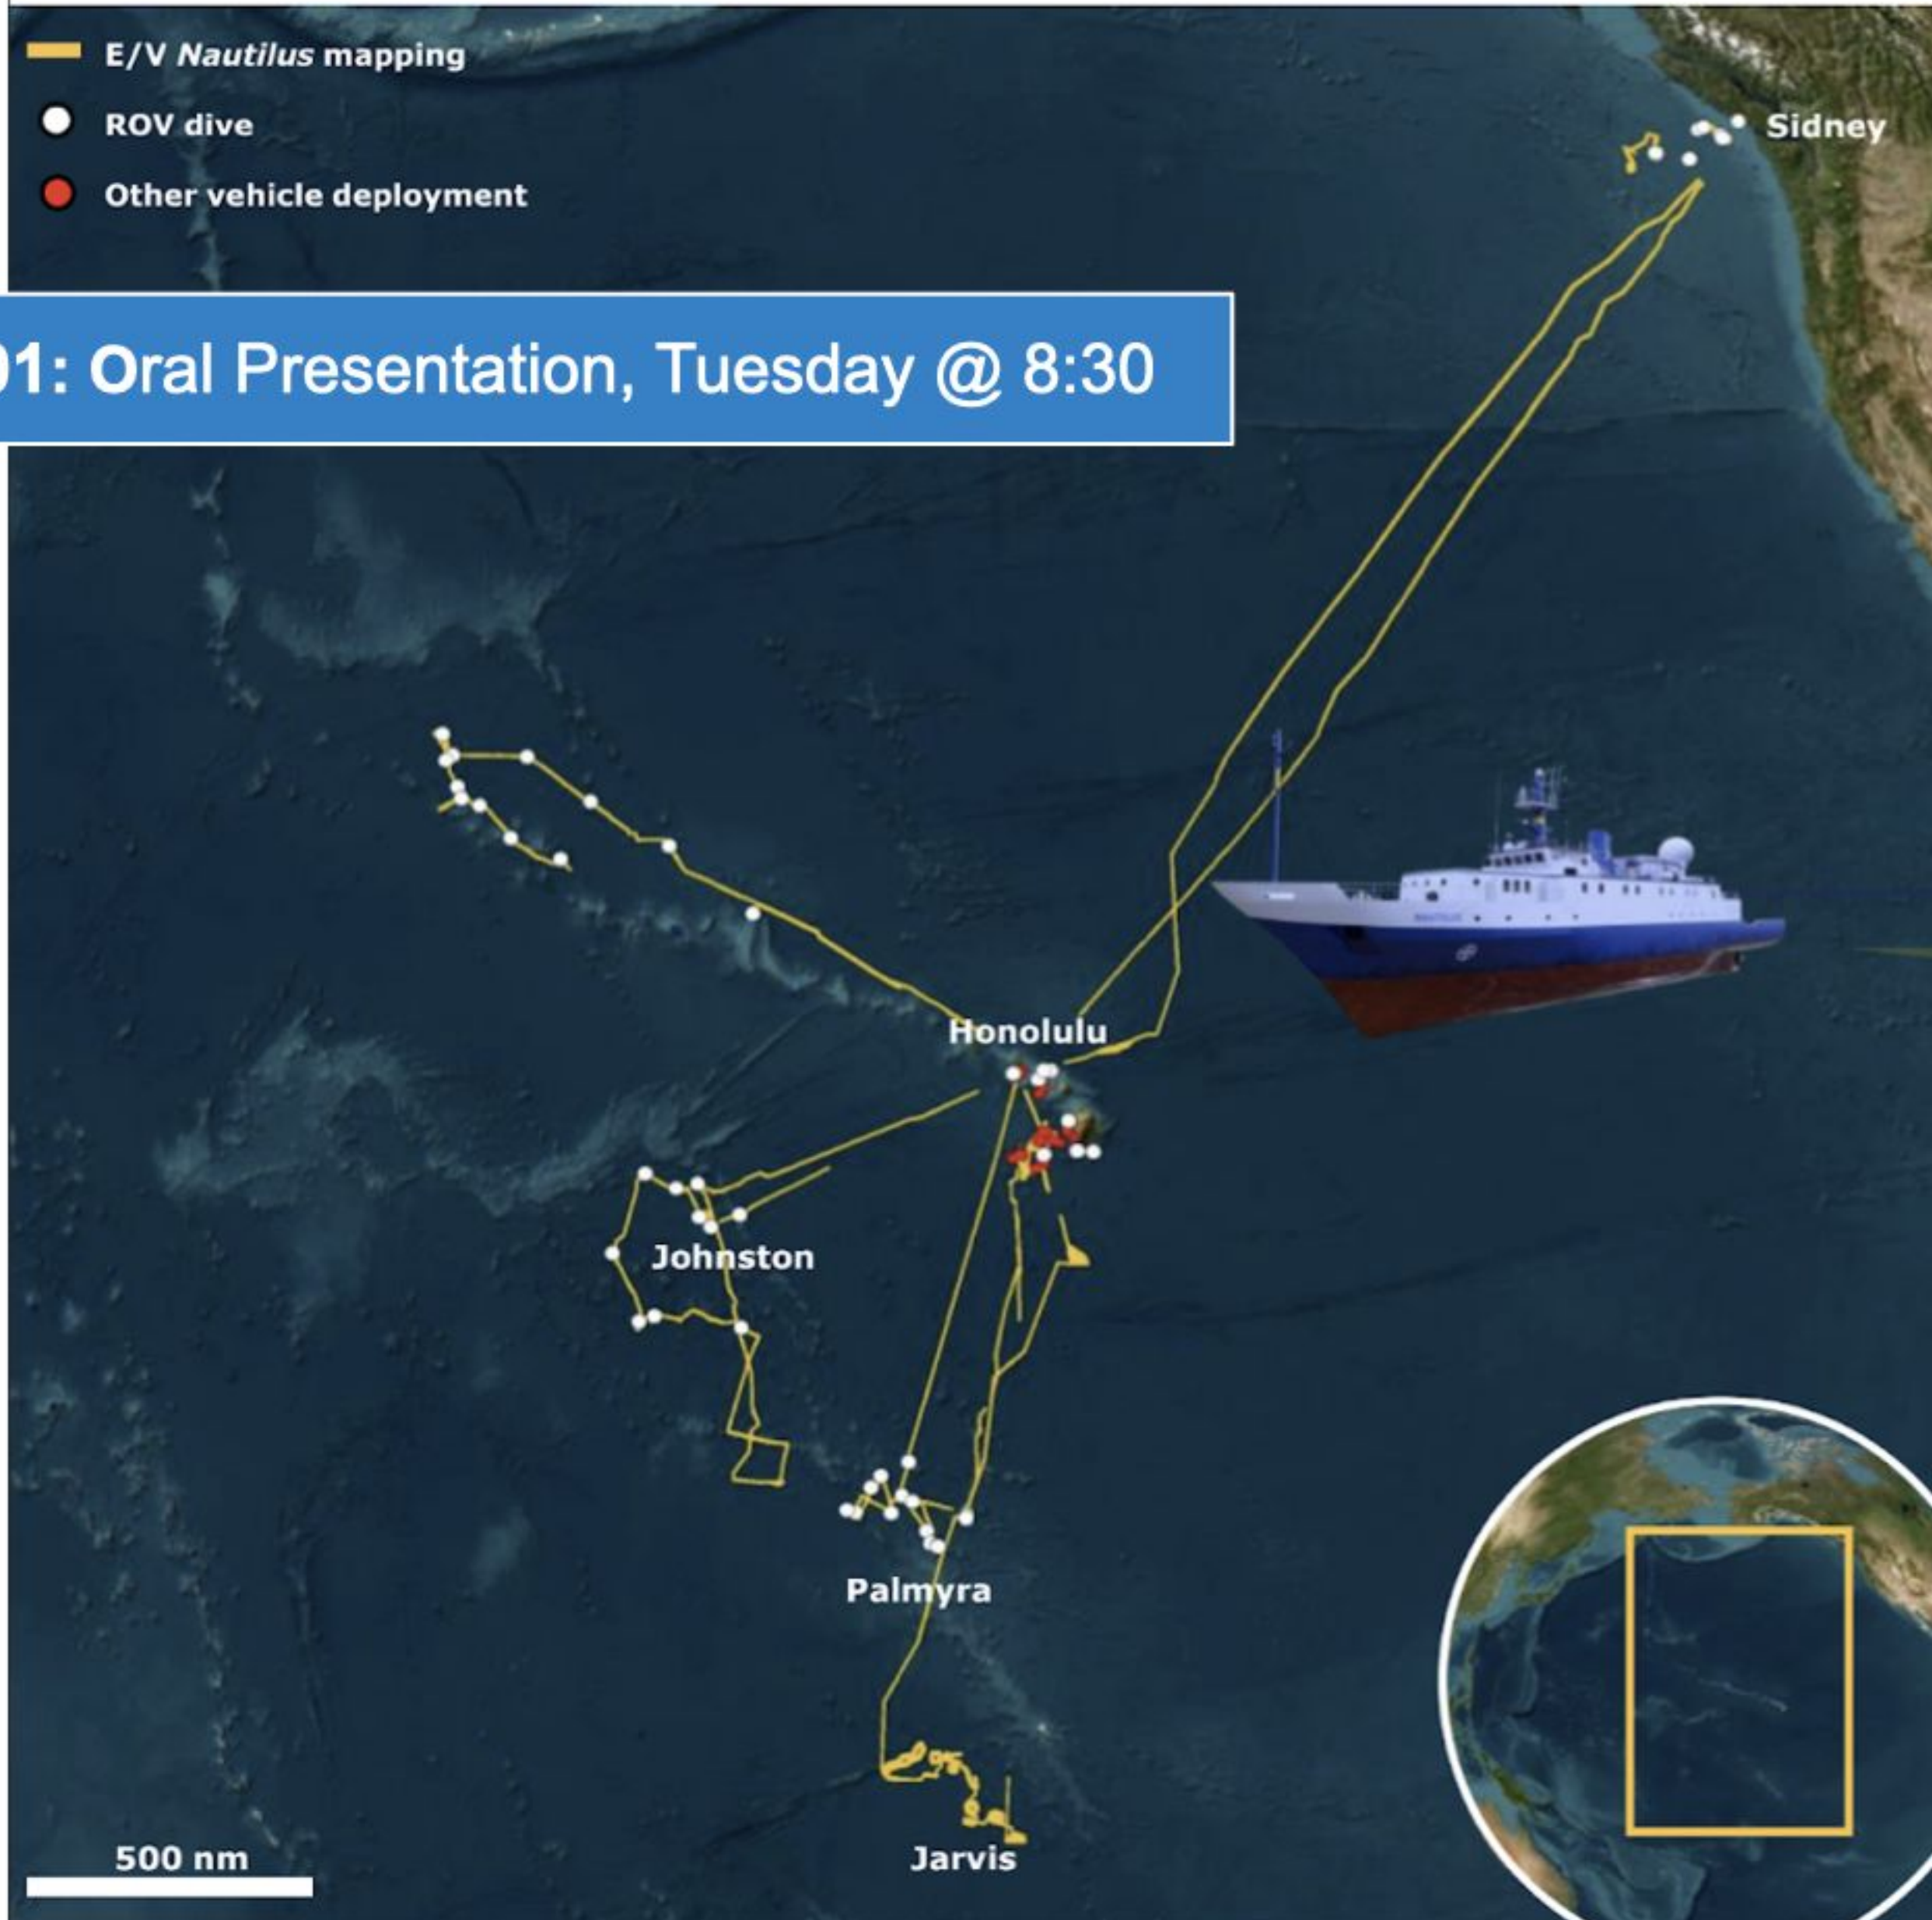

THE UNIVERSITY OF RHODE ISLAND

# 2023 E/V NAUTILUS FIELD SEASON

DS21A-01: Oral Presentation, Tuesday @ 8:30

- 12 expeditions
- 215 days at sea
- 183,473 km<sup>2</sup> of seafloor mapped
- 85 successful ROV dives
- 1,080 hours of ROV exploration
- 54 other vehicle deployments
- 1,131 samples collected
- 55 students at sea
- 122 scientists participated remotely
- 710 live ship-to-shore interactions
- 30,500 ship-to-shore participants
- >1,400,000 live stream views
- >9,300,000 highlight video views
- 3,845 media stories

ED12A-04: Oral Presentation, Monday @ 10:30

Prepared for the 2022 National Ocean Exploration Forum

# Re-envisioning the Collective Voyage for Ocean Exploration

By Kalani Quiocho (NOAA Office of National Marine Sanctuaries, Pacific Islands Region), Allison Fundis (Ocean Exploration Trust), Kanoe Morishige (NOAA Papahānaumokuākea Marine National Monument, contracted by Lynker Technologies), J. Hau'oli Lorenzo-Elarco (Honolulu Community College), Hōkūokahalelani Pihana (Nā Wa'a Mauō Marine Stewardship Program), Dr. Alyssa Anderson (University of Hawai'i at Mānoa), and Megan Cook (Ocean Exploration Trust)

## Vision Statement

By 2032, ocean exploration will have a thriving community of practice that supports development of a diverse workforce, facilitates effective communication, and advances national and community priorities for exploration. These efforts will support a cohesive public value proposition for ocean exploration.

STUDENT EXPERIENCES ABOARD SHIPS

# ROV OPERATIONS UPDATE

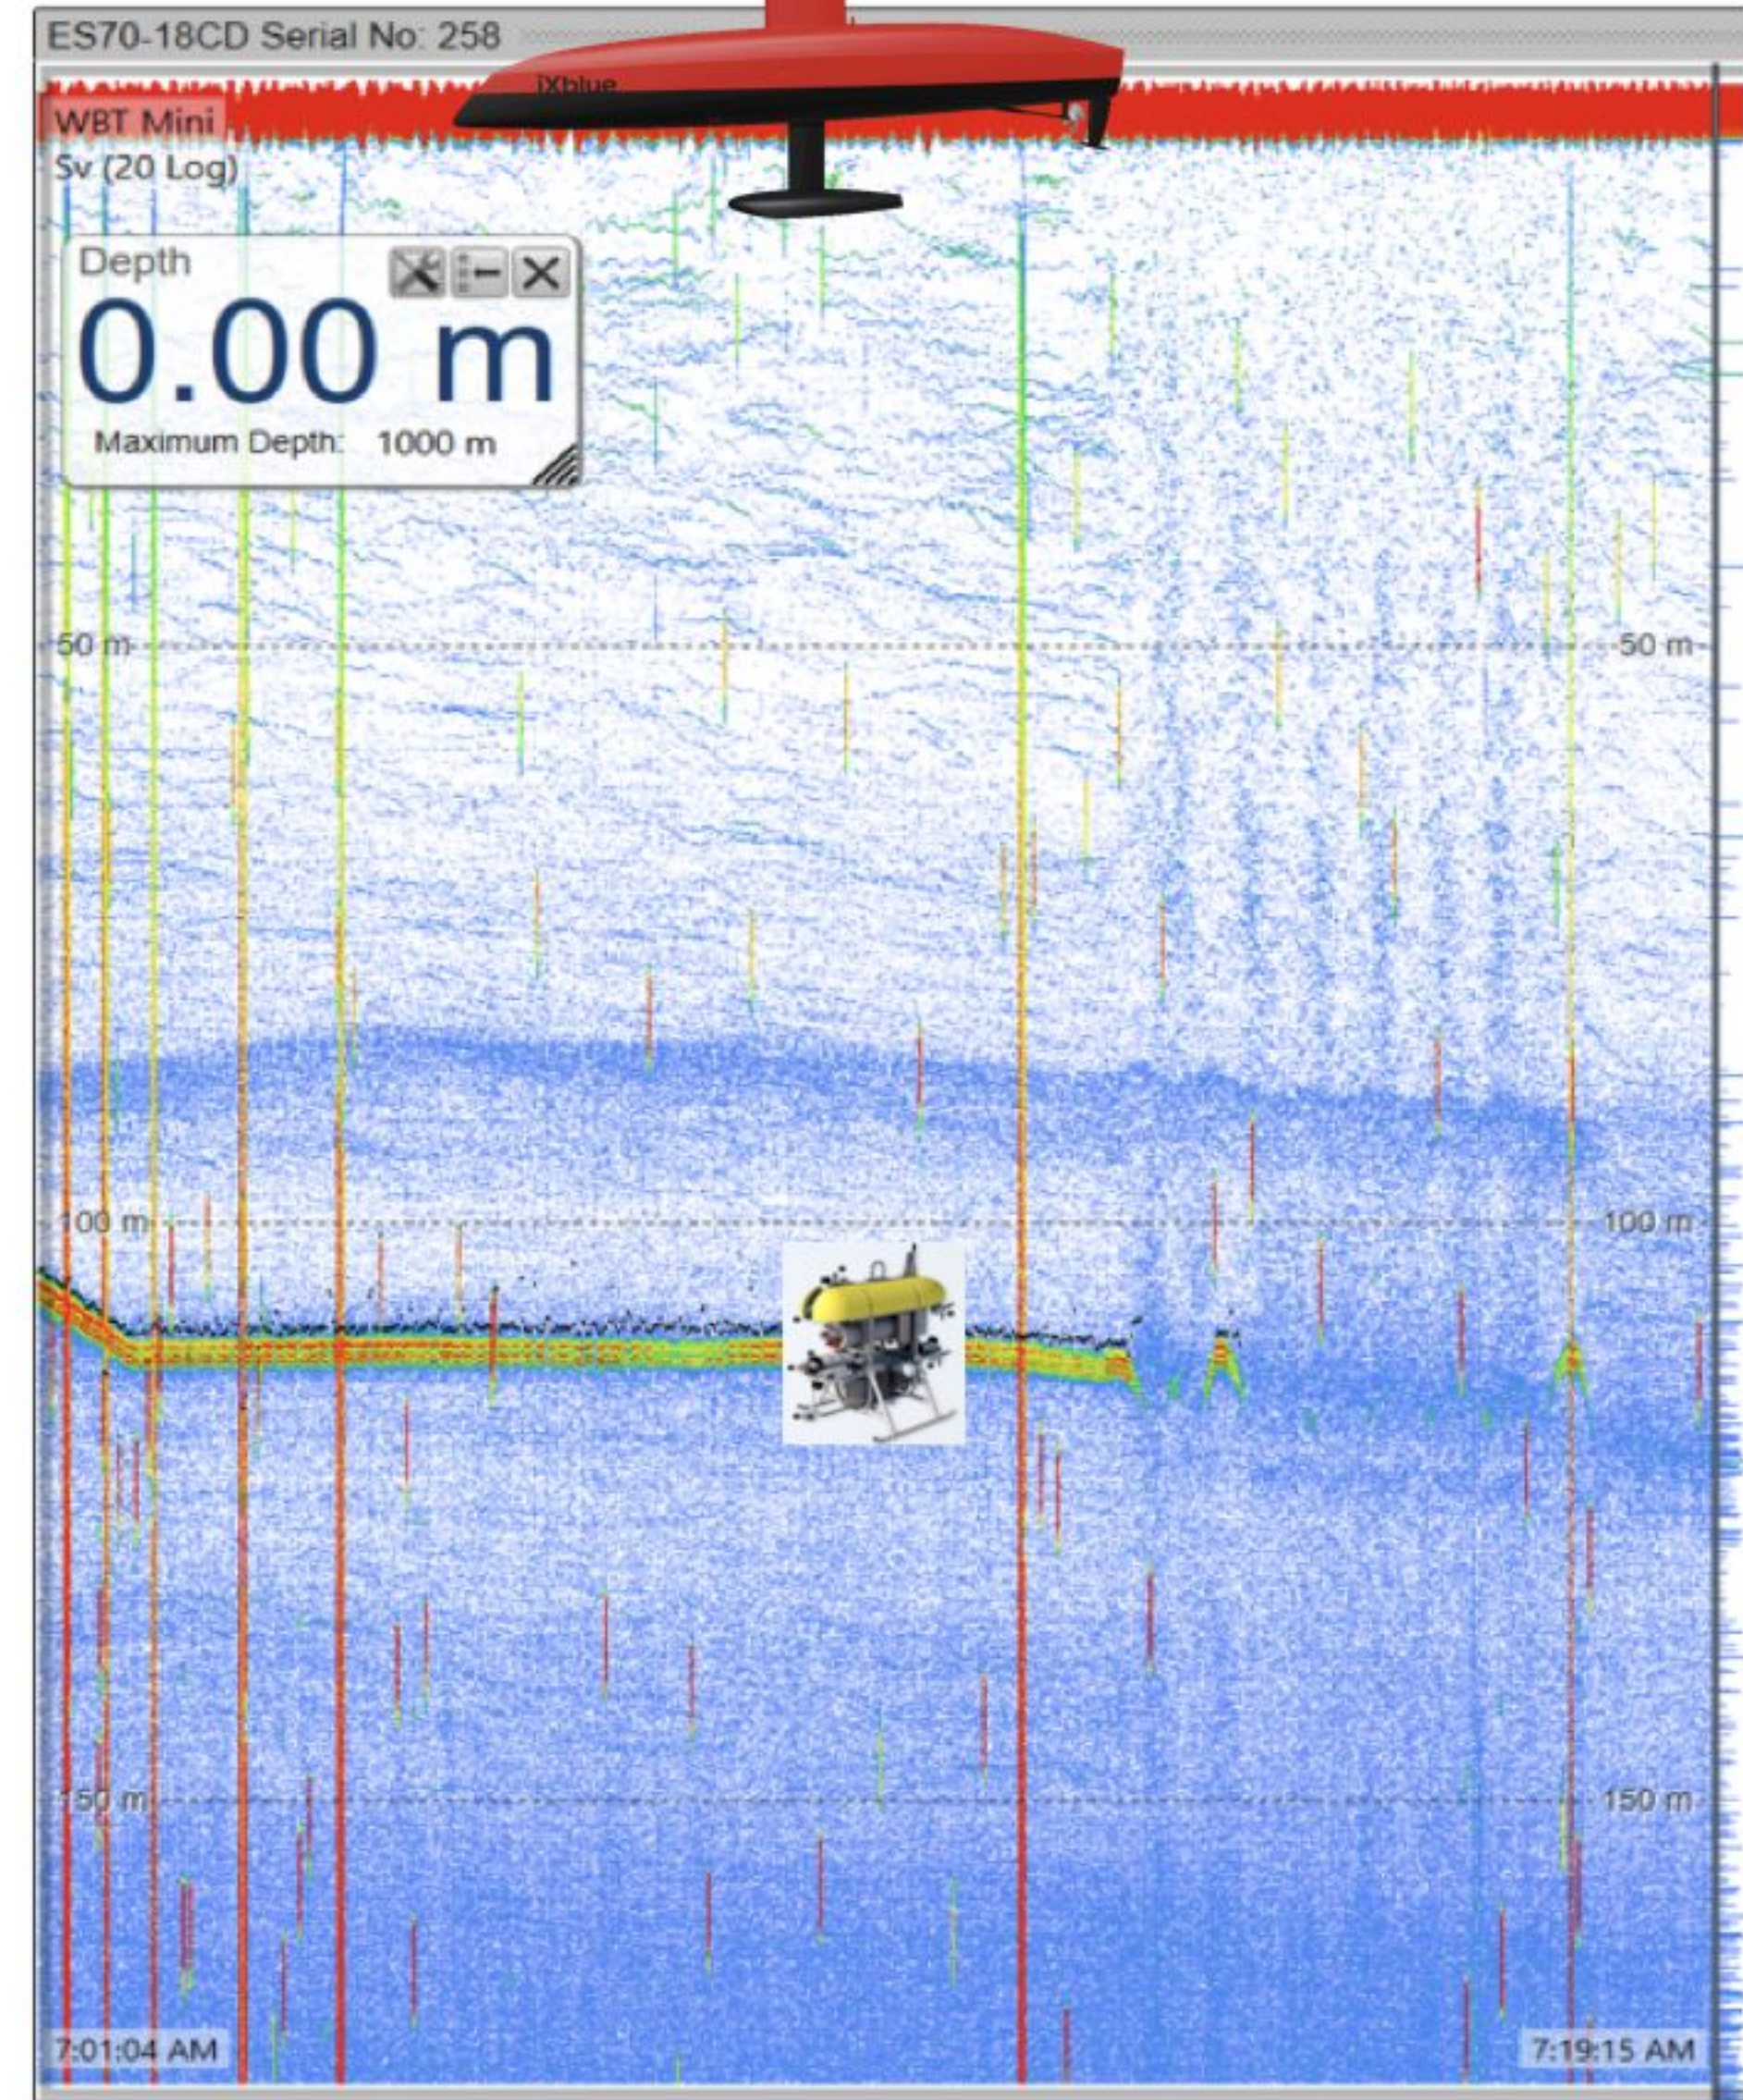

- Deepest dives in OET's history to ~5500m to survey historically significant Battle of Midway Wrecks: USS Yorktown, IJN Akagi 赤城, and IJN Kaga 加賀
- Integration of Impossible Sensing's Laser Raman Spectrometer to collect geochemical data in situ
- Integration of Sexton Widefield Array Camera with Norbit sonar to capture ultra-high-resolution imagery and immersive video footage

DS34A: Poster, Wednesday @ 16:00

# VEHICLE CONOPS UPDATE

- Remote Operations (*Allisa Dalpe/WHOI*)
- Multi-vehicle Operations
  - Upgrade of UNH's DriX EM2040 > EM712 and integration of StarLink
  - Evolution of "Verified Direct Sampling" and automated tracking behavior to only pass over AUV every 10 minutes (as to not impact avoidance behavior of mid-water targets)
  - Demonstrated over-the-horizon ops (40 km range) with remote operations
- In 2024...
  - DriX to operate from shore and rendezvous with Nautilus/Mesobot offshore

## DATA SYSTEMS UPDATE

- Ongoing collaboration with WHOI & SOI (via SOVA group) to collectively improve data management through tool commonality, best practices, and targeted conversations.
- Optimization of Fortigate device (network firewall) to shape traffic between VSAT, StarLink, and cellular modem.
- Operationalized new EK80/ADCP sensor aboard *Nautilus*.

**OCEAN NETWORKS CANADA**  
NA161 CABLED OBSERVATORY MAINTENANCE

NA160/2 MID-PACIFIC MULTIBEAM MAPPING

**PALAU NATIONAL MARINE SANCTUARY**  
NA167/8 ROV & MAPPING EXPLORATION

**PACIFIC REMOTE ISLANDS MARINE NATIONAL MONUMENT**  
NA163 JARVIS ISLAND ROV EXPLORATION  
NA166 MAPPING HOWLAND & BAKER ISLANDS

**NATIONAL MARINE SANCTUARY OF AMERICAN SAMOA**  
NA164/5 MULTI-VEHICLE OCEAN EXPLORATION

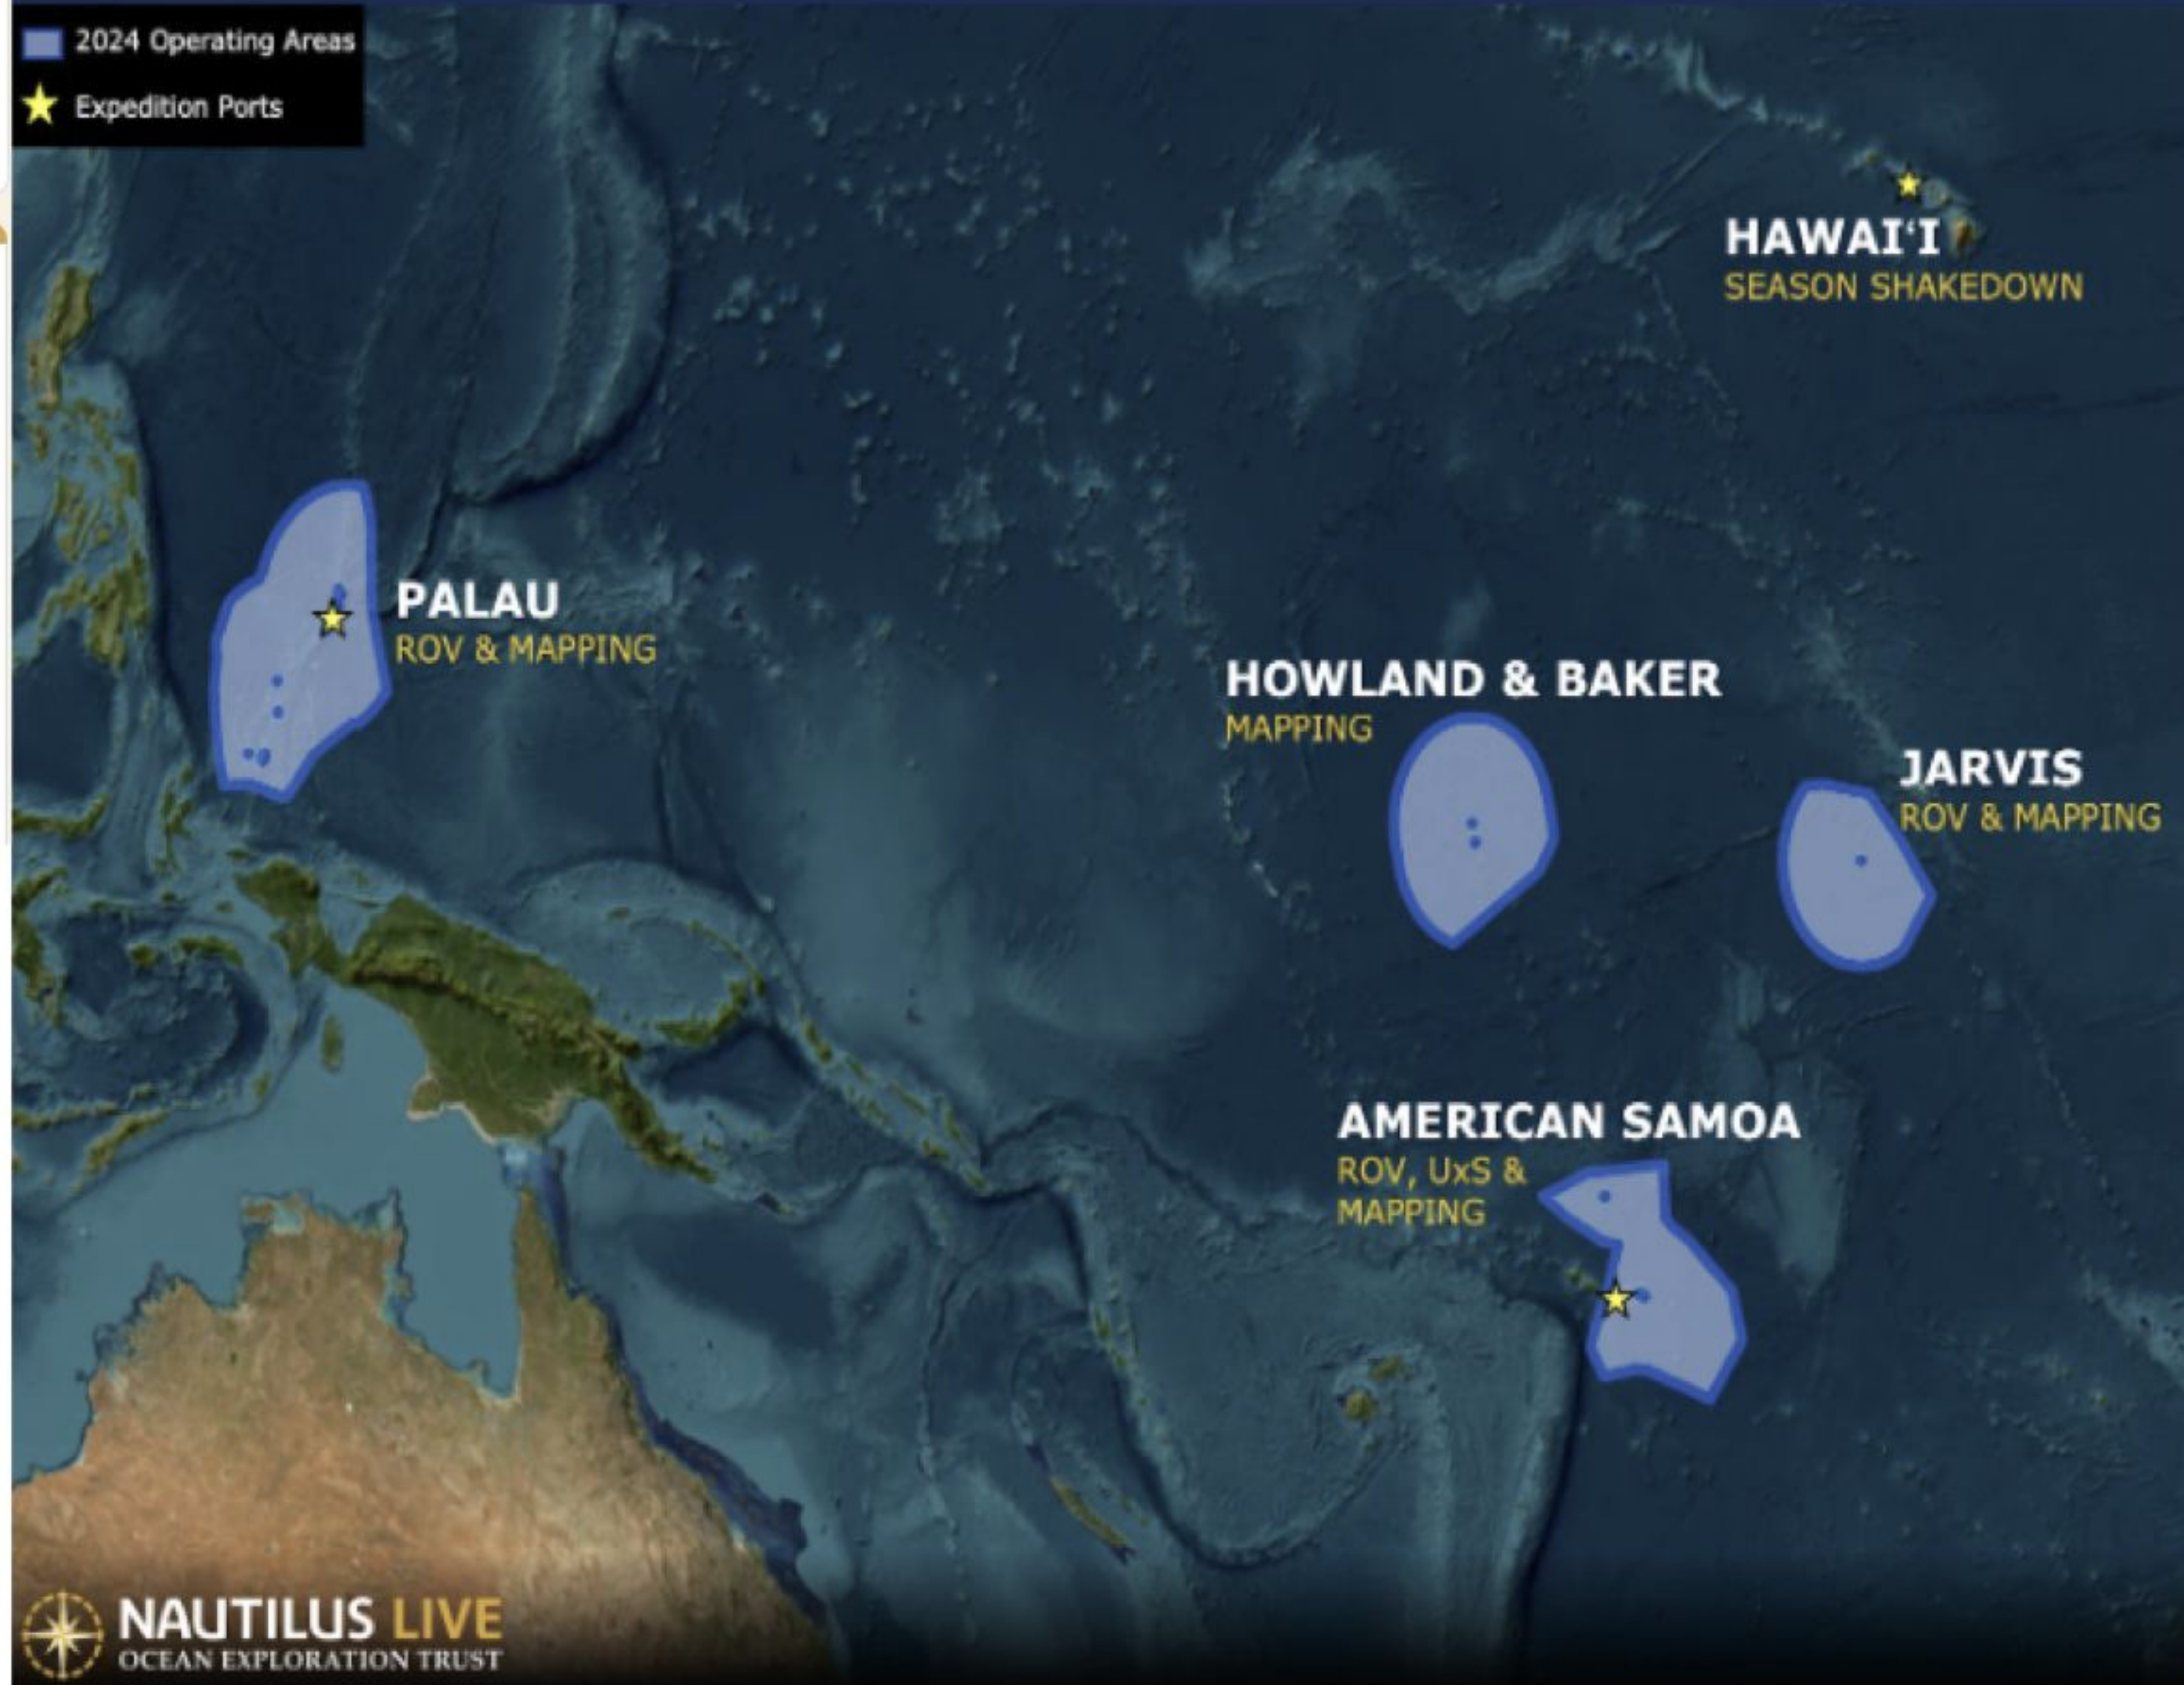

## 2024 E/V *Nautilus* expeditions call for science input

In 2024, E/V *Nautilus* will conduct several telepresence-enabled, multidisciplinary expeditions to explore the deep sea throughout the Pacific. The purpose of this form is to provide an opportunity for input on expedition planning by identifying exploratory interests, mapping priorities, ROV dive targets, physical sample requests, and technology integrations. Please provide your input by **February 1, 2024**. Information received will be used to open up opportunities for collaboration and refine expedition plans, which will be discussed during community webinars preceding each expedition.

- Subject Area of Expertise
- Physical Sample Request
- ROV Exploration Targets
- Mapping Priorities
- Technology Integrations
