

## Remembering Jeff Rupert

LAMONT DOHERTY EARTH OBSERVATORY  
 COLUMBIA CLIMATE SCHOOL

Jeff worked for LDEO Office of Marine Operations (OMO) from 2006-2019 serving as Marine/Science Coordinator (2006-2010) and as Technical Services Manager (2010-2019). After graduating with his BS in Geology from San Jose State in 1976, he joined the USGS in Menlo Park as Marine Science Technician. He then moved into industry, first with NEKTON, then at Western Geophysical/Western Geco, where he held multiple roles around the world, including London, Houston and Norway.

In 2006, Jeff made what he called a “leap of faith” to join Lamont’s OMO. He immediately jumped in to help outfit the Marcus G. Langseth Drawing on his endless stream of industry contacts and friends, Jeff recruited experienced technicians and secured critical equipment through deals and donations that are hard to quantify. He helped ensure that the Langseth was ready to deliver world-class science.
