II	<u>Attendance</u>
III	UNOLS Report
IV	LDEO Operator's Report
V	Incline Village Workshop Part I
VI	Incline Village Workshop Report
VII	Hawaii Mohole Survey
VIII	MLSOC Membership

Executive Summary-

The MLSOC met on Sunday December 12, 2010 at the San Francisco Marriott for the winter meeting prior to the start of AGU. This was our second committee meeting in 2010.

Welcome and Introductions

Graham Kent opened the meeting at 2 pm with welcome remarks and introductions. An overview of the Incline Village Workshop was given. Graham also reported on the LDEO Strategic Planning Session held in San Diego on Oct 24-25, 2010, which was followed by an MLSOC Meeting on October 26, 2010.

Agency Reports-

ONR- Tim Schnoor

ONR wants to stay informed on the activities of the MLSOC and the R/V Marcus Langseth and thanked the committee for efforts over the past year.

NSF-Jim Holik

Thank you for getting the proposal in on time. The SSSE proposal was submitted in December and the panel is Feb 9th for both the SSSE and Instrumentation proposal.

UNOLS Report- Jon Alberts- See Appendix III. Jon presented an update on the UNOLS Office. Several topics were reviewed including UNOLS staffing, recent projects and efforts, outreach initiatives and upcoming meetings. A review of the ship schedules for 2011 was given and more details on the Langseth schedule were provided in the LDEO Operator's report. The current membership of the MLSOC was reviewed and further discussion followed on recruiting and electing new members. The ongoing effort by the Council was given along with the work of the other UNOLS committees.

LDEO Operator's Report- See Appendix IV.

Sean Higgins provided the operators report covering many topics. This included the recent shipyard period

in Portland, Oregon in February 2010 and a review of completed projects which included engine upgrades, multibeam installation and recalibration.

Sean updated us on the multibeam system and a science report on the Korenaga cruise.

An overview of the maintenance planned for October 2010 through March 2011

Langseth Glosten Report- A report to study the winches and possible installation of new winches was conducted by Glosten. For phase I, the cost estimate was 1.2 million.

MLSOC Report- See Appendix V & VI

Graham Kent, Chair of the MLSOC reviewed current activities. This included the Incline Village report and the recommendations which came out of this workshop. The recommendations covered various types of proposals, a separate panel for judging proposals, processing of data, training of the next generation and improving the educational footprint. The recommendations have been sent to NSF and their review is being conducted now.

Glossy Brochure- Steve Holbrook and Graham Ken tare working on this. The MLSOC is asking for input from community. We need to consider our audience and need to get it out to other people to see if brochure is effective. Send it to NOAA, NSF, ONR, USGS, and industry.

Hawaii MoHole Survey- See Appendix VII

Greg Moore/University of Hawaii presented a Power Point on the Community Proposal Mohole Site Survey Northwest of Oahu.

MLSOC Membership- See Appendix VIII

We have 2 vacancies on the membership for the MLSOC. Ray Schmitt has decided to step down. The UNOLS office will do a call for nominations. We need a physical oceanographer and a marine mammal expert on the committee.

Next meeting is scheduled for summer of 2011.

Meeting Adjourned- 5 pm
